

Week of 1/29/2024

2/2/2024

- Got C# debug and config up and running.
- Got rough attack animation working, need to add hitbox to weapon. Prelim will be replaced with iterative models and animations.
- Modeled rough arm of generic human male to be put into the game as a prelim main character.

2/3/2024

- Put prelim enemy in the game
- Added prelim hit detection
- Added comments to the player.cs file

2/4/2024

- Added enemy detection via ray cast
